Remains of John Jones Buried in Youngstown

The remains of John Jones, a former resident of Chinook, who met an untimely death on Tuesday of last week, were buried in the Youngstown cemetery on Friday afternoon. The services were in charge of Rev. D. E. Hattie, of the United Church.

Mr. Jones met death while cranking his car. He has been a buyer for the Ardley Grain Co. at Hemaruka, and was preparing to go home about 5 o'clock after closing the elevator. He was found where he collapsed in front of the car and was taken to the Hamilton store and the Veteran doctor sent for. He remained unconscious to the end, dying shortly after the arrival of the doctor.

Mrs. Jones was in Youngstown at the time of death, having motored up from Hanna the same forenoon, and intended to go home with a neighbor that evening.

John Jones, with his family, was a resident of Chinook for several years, being in charge of the United Grain Growers' elevator, and afterwards traveling superintendent of the same company. The Jones family moved to Calgary from here and, after a few years, returned to their farm in the Wastina district, six miles south of Hemaruka.

The Jones family have a host of friends in this community who regret the sudden death of Mr. Jones, and sincere sympathies are extended to the family.

Besides a widow the deceased leaves two sons and two daughters—Stuart and Irma (home), Lawrence (Calgary) and Mrs. Anderson (Hanna).

An average sized ape can pull four times as much as a man of the same weight.

Bill Sutherland Acquitted Case Taken from the Jury

The trial of Bill Sutherland, charged with assisting Joe Kelly to escape, resulted in an acquittal. The court opened at 10 a.m., with Judge Ives, Calgary, on the bench. After hearing the evidence the judge made his decision immediately. Lawyer Cogan defended the accused and Lawyer Oldham prosecuted. Among the witnesses from here were W. A. Hurley, Mr. and Mrs. R. D. Vanhook, Harman Vanhook, Lloyd Robinson, J. Peyton, Roy Mart, Leonard Bayley, Dan McLennan, John McLennan.

The trial was held in Hanna on Monday.

Change of Name

O. L. Mielke announces a change in the name of the company he represents from the Imperial Lumber Yards, Ltd., to the Imperial Building Supplies, Ltd. The policy of the company—that of supplying its customers with high grade material coupled with good service and courteous treatment—remains the same.

Ho! Bridge Club

While playing bridge at the home of Mr. and Mrs. George Wade on Saturday night, Ben Campbell held 13 spades in one hand. Mr. and Mrs. Clark were also guests; the exceptional hand being dealt by the latter. —Hanna Herald.

Agricultural Society Meeting

The annual meeting of the Chinook and District Agricultural Society will be held in the 'Agricultural' Hall on Saturday, December 7, at 3 p.m. **HORACE DUNSTER,** Secretary-Treasurer.

Joe Kelly, Who Escaped from the Youngstown Jail on October 26, Arrested in Detroit, Mich.

Word was received here on Saturday from Constable Shaw, of Youngstown, saying that Joe Kelly, who had been arrested for holding up W. A. Hurley on the morning of October 25 and locked in the Youngstown jail, where he escaped early the following morning, had been captured at Detroit, Mich. He gave no details in his message.

From the time of Kelly's escape until late last week the police learned nothing of his whereabouts. On Monday evening the following story appeared in the Calgary Daily Herald:

Word reached the local head quarters of the provincial police, during the week end, that the man known in Alberta as Joe Kelly, who escaped from the Youngstown lock-up, where he was held on two charges of robbery with violence, a month ago was in the custody of the Detroit police, charged with robbery while armed. It has not yet been decided whether or not Kelly will be brought back to face trial on the two Alberta charges.

Kelly was arrested as being one of the two men who broke in and robbed general stores at Cessford and Chinook early in October. He was confined in the Youngstown lock-up, but on the night of October 26, with the aid of a confederate, managed to saw his way out. An intensive search for the

fugitive was at once instituted by the A.P.P., but for several weeks was unsuccessful.

Prior to his escape, the police, under the impression that Kelly was an old offender, took his finger-prints and forwarded them to the finger-print section of the R.C.M.P. at Ottawa. It was later discovered that the Ottawa authorities had a record of Kelly as the man who, under the name of Theodore Douglas, had been sentenced at Spokane to from 5 to 10 years, for burglary in May, 1925. This same record was also found on file by Oscar Woodhouse, of the Calgary police finger-print bureau.

On communicating with the Spokane police, the A.P.P. received the information that Kelly—or Douglas—had been arrested in Detroit on a robbery while armed charge, and was being held by the police there. A telegram from the Detroit police corroborated this information.

Kelly has not yet been tried in Detroit, but according to the police of the Michigan state, there is a strong case against him and he is likely to be convicted. In this event, the Alberta authorities will not be able to secure the fugitive until he has served his term. On the other hand, if Kelly is acquitted, the Detroit police will hold him for the Alberta Provincial Police.

Unusual Historic Interest Is Attached To The Main Water Routes Of Northern Canada

Practically speaking all the main water routes of Canada have been travelled for a century or more. The veil that for so long obscured the movements of the early travellers and traders is being slowly lifted by modern surveys and with the progress of organized mapping methods almost limitless lands of scenic beauty, rich in resources, are revealing themselves with the stage all set for an era which will be theirs, the area of northern development.

In the new Pelican Narrows map, Provisional Edition, National Topographic Series, embracing 5,500 square miles on a scale of four miles to the inch, presently released from the presses of the Topographical Survey, Department of the Interior, at Ottawa, another segment of their surprising inheritance is brought to the notice of Canadians.

This map is featured by the Churchill River, with the famous trade route, 201 miles long, from The Pas by Sturgeon River to the Churchill, over Frog Portage, cutting the southern portion in two. The Reindeer River, which is the canoe route leading to Reindeer Lake, divides the northern half.

As long ago as 1775, Joseph Frobenius, of Montreal, Northwest Company fur trader, discovered the Sturgeon River route from Cumberland past Pelican Narrows to Frog Portage on the Churchill, which has remained ever since the main waterway leading to the northern interior and the great Mackenzie Basin.

Frobenius was so successful in his first year's trading that he was unable to carry away all the furs he acquired. In 1776, Alexander Henry, the elder, and the Frobenius brothers built a post at this point, and that year obtained 12,000 beaver skins from the Indians "besides large numbers of other and marten."

Peter Pond, also from Montreal, followed Frobenius's route to Frog Portage in 1778, and eventually reached Lake Athabasca. His map of 1785, said to have been made for the Empress of Russia, is the first one that shows the Churchill from its source to its mouth.

After, Pond came those distinguished forerunners of the surveyors of today, Philip Turner, surveyor for the Hudson's Bay Company, in charge of a survey party with Malcolm Ross as his assistant surveyed the Sturgeon River up to Pelican Narrows, and on to Frog Portage in 1781, and from thence made a track survey of the Churchill to its source. His report is in the head office of the company in London. His sketch map was incorporated in Arrowsmith's map of North America.

David Thompson, greatest surveyor of them all, travelled the country embraced in the Pelican Narrows sheet in 1786, and surveyed the portion of the Churchill between the mouth of the Reindeer River, and the Reindeer itself to Reindeer Lake, which lies off the map to the north. Below the junction of the Reindeer and Churchill the Indians report the remains of an old trading post, supposed to be the Fairford House built by Thompson.

Another famous explorer-surveyor, Peter Fidler, between 1807 and 1809, repeated Thompson's survey of the Reindeer and the portion of the Churchill in the newly-mapped area. For nearly seventy years afterwards, until the late Dr. Robert Bell reported on it, the Upper Churchill was ignored by geographers. With the issue of the Lac la Ronge, Pelican Narrows and Kiasassing map sheets by the Topographical Survey, 144 years after Peter Pond's first crude map, this portion of the river is completely and accurately mapped for the first time.

Today, as in the old days, when travellers were almost wholly dependent upon it, the fishing never fails. Sturgeon, whitefish, lake trout, pickerel and pike plentifully populate the bewildering waterways of connecting lakes and rivers.

And still the furs pour down the

amphibian way from the Arctic to the Saskatchewan with the Pelican Narrows "fur garden," as Malcolm McLeod called it, adding its quota by the way. Romance has not departed from the region, even though the light "northern canoes" of birch bark guided by electric-eyed Iroquois have been replaced by the cedar or canvas canoe of the modern surveyor, prospector and fur trader.

During the migrations from the breeding grounds near Hudson Bay the innumerable lakes swarm with geese and ducks. Pelicans and cormorants breed in the tract, nesting in great numbers on small rocky islets.

Across from Frog Portage a solitary settler raises grain and vegetables. Here he has constructed a primitive grist mill, the second one on the Churchill, the other having been burnt over half a century ago at Stanley, located as shown on the Lac la Ronge map sheet.

About the time that Warren Hastings began peering the East Indian Empire together, in the same year that saw the battle of Dunker Hill, and while Captain Cook was opening the way for British colonies in the Southern Seas, the Pelican Narrows country was traversed by Frobenius. Such as it was then it remains today, except that the wandering Indians have been more or less segregated on their several Indian Reserves on Pelican, Wood and Minnow Lakes and around the Pelican Narrows post of the Hudson's Bay Company, where is one of the largest settlements east of Athabasca. At this point, too, there is a Royal Canadian Mounted Police barracks.

A good deal of water has flowed down the Hudson Bay in the century and a half, and on its tide many millions of dollars' worth of furs. Wild as it looks, studded with lakes and threaded with greater and lesser streams, yet this 5,500 square miles of territory has contributed its share to the commerce of the country. Minerals, timber and fishing resources are yet untouched and so are the water powers, with the exception of those at Island Falls now being developed.

Demand For Silver Fox

Has Become Most Popular Fur In The World Over

What is the most popular fur among the world's women folk? According to Canadian breeders it is the silver fox, for the demand has risen by phenomenal leaps and bounds. A statement has been issued by the Canada Silver Fox Breeders' Association to the effect that last year no fewer than 55,000 foxes belonging to its 6,000 members were inspected in all parts of the Dominion. The industry is now declared to be so well established that it is not very much affected by booms or depressions and is solidly based upon a steady market for Canada's furs the wide world over. Fox farming is therefore becoming one of the most popular and profitable of the minor industries in the Dominion. Live foxes raised on Prince Edward Island farms sold last year at prices ranging from \$60 to \$200 per pair, those from families with exceptionally high pelts records fetching of course, much more.

Printed velvet with the bands made of plain velvet in predominating tone of print is very effective. A plain sheer velvet in black with metal cloth bands in beige shade is exquisite for afternoon. Fall silk crepe, dark rayon crepe in tweed pattern, crepe de chine, canon crepe, and Kashmir's jersey attractive selections. Pattern price 25 cents.

Qualified For Society

Lindbergh Has Been Admitted Into National Society Of Long Fellows

Lindbergh, the lone Atlantic flier, has achieved another distinction—he has been admitted into the National Society of Long Fellows. To qualify, one must be at least 6 feet 1 inch tall. One Los Angeles man qualified with a height of 8 feet 9 inches. Two years ago the society was started, and it already has 3,000 members, who are striving for longer and higher earnings, signs and ceilings restaurant tables that do not require "long fellows" to hold them up with their knees, and beds that do not double them up.

Only One He Knew
A teacher had been telling an infants' class about the ten commandments. In order to test their memories she asked: "Can any one give me a commandment containing only four words?"
A hand was raised immediately.
"Well?" said the teacher.
"Keep off the grass," said the youngster.

Only three per cent. of the wood cut in the United States goes into the paper industry.

An elephant's trunk contains 40,000 muscles.

(By Annabelle Worthington)

A black crepe satin that follows the Princess lines with molded bodice and full flaring hem.

The dull surface is used for the entire dress with the exception of applied bands and trimming pieces stitched to bands at left side, which are made of the shiny surface.

Style No. 3002 designed in 5'2 1/2 to 5'8 inches, 36, 38, 40 and 42 inches bust is easily made in about two hours. The outlay is very small, and it's a dress that will meet everyday requirements gracefully for the woman of moderate budget. It's a splendid choice. Don't hesitate!

In feather-weight woolen in self-checked pattern in plum shade, it is a Paris favorite. It shows clever manipulation of fabric with the bands cut on the bias, repeated in trimming pieces.

Printed velvet with the bands made of plain velvet in predominating tone of print is very effective. A plain sheer velvet in black with metal cloth bands in beige shade is exquisite for afternoon.

Fall silk crepe, dark rayon crepe in tweed pattern, crepe de chine, canon crepe, and Kashmir's jersey attractive selections. Pattern price 25 cents.

Poultry Improvement Work

Quality Of Stock Being Gradually Improved In Some Sections

Illustration stations distributed over the country and operated under the direction of the experimental farm, at Ottawa, are having a fine influence on the improvement of poultry.

In the Eastern Quebec stations four years ago, there were only 375 purebred birds kept on the twenty stations then in operation. In the report of the chief supervisor of the stations, for 1928, published by the Department of Agriculture, at Ottawa, it is shown that last year 1,650 of the 1,900 birds kept on twenty-two stations in the same part of the country were purebred and principally of the Barred Plymouth Rock breed.

The securing of these better birds has induced a number of the operators and adjoining farmers to improve their housing accommodation. On some of the farms houses have been built to accommodate 250 birds, and on other farms old buildings have been, remodelled making needed improvements in light and ventilation. The quality of the stock is being gradually improved by utilizing more and more purebred cockerels from stock which has produced 200 eggs or more in a year.

This work has so improved flocks as to make them breeding centers for the districts in which they are situated. During the year under review, there were sold from these stations for breeding purposes 516 cockerels and 459 pullets. There were also sold 1,831 settings of hatching eggs.

Just Another Fallacy

Candy And Other Sweets Do Not Injure Teeth

Are you one of those who still cling to the belief that such things as molasses, maple syrup, sugar and candy are injurious to the teeth and should not be given in quantity to children?

If so, banish the idea to the place where you have cast the equally silly notions that tomatoes will produce cancer, and oranges make your body acid.

Scientists are proving that teeth are built up or worn down largely from within. Food is, of course, very important—but chiefly as it enters the blood stream. A well-balanced diet in which there is an abundance of calcium is the best assurance of a good set of teeth.

As for candy and other sweets making the teeth ache, that is a different story altogether. Teeth ache because they have cavities and need attention—and something sweet is the greatest little warning friend one could think of.

A well-known physician recently told several pupples with large amounts of the sugar called glucose for three years and no decay appeared in their teeth. So don't worry about your teeth when you eat something sweet. If a nerve is struck visit the dentist, and thank the piece of candy for warning you in time to catch a small cavity rather than the large one which would have developed so quickly.

"So he isn't interested in antiques any more?"
"No, not since one sued him for breach of promise."

Some of the canoes built by the first race of Hawaiians could carry 50 men.

Province Wide Campaign Is Conducted In Manitoba For Promotion Of Oral Hygiene

Mouth health is a matter of romance. Evidence of this fact is contained in a public health report, just issued, which departs from the customary stereotyped phraseology to reveal a thrilling story.

Report of the Manitoba Mouth Health Campaign, issued by the Canadian Dental Hygiene Council is, in brief, a synopsis of a province-wide drive for the promotion of oral hygiene. An effort, organized, primarily by the council, issuing the report, it developed into co-operative campaign under the supervision of the Manitoba Dental Association, and under the auspices of the provincial departments of health and education, with the assistance of the Red Cross, and the active aid of practically every public welfare body throughout the length and breadth of Manitoba which from Emerson to The Pas was zoned.

Local committees appointed, and the dentists of the province gave their skill, and some of their spare time, and to the task. The examinations were individual, each child getting a chart, a list of personal suggestions and professional advice gratis.

In a manner of speaking, this service was a paradoxical one. Its purpose was to eliminate in the rising generation, the dental ill-health prevalent in this one, to the treating and remedying of which, naturally, these same men devote their careers.

But the romance comes largely from one special aspect of the affair. In the sparsely-settled sections of the north were many children far beyond the services of a regular dentist. To these, of course, knowledge of the principles of oral hygiene so that they might forestall unhealthy conditions was of extreme importance. But there was the further question of treating existing cases which in need of it and not only too far from the ordinary professional aid but also, very often, without the financial means to secure it if it were available.

For these—most of them new Canadian immigrants—where dental hygiene received scant attention—a free travelling clinic was put into operation and over 1,200 children received treatment.

The dentist in charge, Dr. Frank Viningstone, describes his trip to these scattered communities in a series of vignettes which are, of themselves, not only a fine piece of writing but also a striking picture of the modern Canadian pioneer.

He tells of his arrival in a tiny Icelandic community where a boarding house parlor is to be his operating room.

"School children, literally vanloads of them from the surrounding country," he says, "a swift examination, then a question or two, a slow injection of anesthetic. This is the first experience of dentistry for any of these children, and one must be careful not to startle them. A brief dismissal and the next one. A cavity is cut out and the filling placed. Time now to extract for the first one. A few words of encouragement and explanation. A few seconds' swift work. Then, 'Hurt?' 'No.' Fine. Good stuff in you, boy, and confidence has been established. A satisfied child is away to show the place where an old offender has been, and explain his sensations to admiring mates.

"A cold winter morning and the mixed train has deposited dentist and equipment at yet another town. Here we set up office in the kitchen of a newly-built Women's Institute and Nursing Service Cottage. The children are waiting from the country, brought in in little cutters with houses built on them, complete even to a small warming stove. This is a fish shipping district and the people are wise in the ways of winter travel.

"Evenings spent in the dispensary," he says of another stop, "where the thin walls mock the huge log-burning stove, and where one needs must wear over-oes indoors to keep the body heat in. Talks of travel and books and cases."

The travelling clinic reaches an outpost hospital. "Another service station for humanity. A place of hope, the centre of community life and a haven working in the tremendous mass of foreign born children came in hundreds, walking miles through blinding snow, by team, by train, in groups sheltered by district mothers and nurses. Came, and came, and came, seeking relief and hurrying away to find a little sister or brother.

"Cases! Six-year-olds with abscesses draining through the neck. Thanks be for ether and the resident physician. Chewing on nerves that had suffered so long they had grown out of the tooth and hardened themselves with a tissue coat to stand the shock of nastication. Teeth twisted and turned

and appearing in almost all places in the mouth and all stages of decay. Cases!"

At another town, the dentist pulled out of another small community, the teacher waiting for him.

"An extra sized toboggan was produced and the kit piled on it. Many were the laughs we had later of that pull through the snow in the pitch dark. To this day, he persists that one of us was going north and the other south inside the rope that would have done credit as a hawser for an ocean liner. This time, a log cabin to work in with a bedroom as a waiting room.

"And Saturday night. Two other cases at the dining room table." He notes of another small community, "and the generous assistance of the mother next door. Later when the little patients were chirping round again and away to bed, a game of cards on the same table. Such are the contrasts of life."

On Sunday, a Ruthenian father and mother called with a little tot of five, one of the worst cases on the entire itinerary.

"Again the ether bottle appears," says the dentist, "and while the father hovers fearfully in the next room, despite words of encouragement, the case is cleared up. Soon the little one is explaining in a foreign tongue, all her sensations to her relieved parents."

A side trip in a worn motor had its own excitement. "We came the last few miles on the rim with the dent at part time on the running board to keep the old car balanced and out of the ditch. Never did a warm stove look better at the five a.m. journey's end."

"And for a fitting climax to the trip was the last ride through a fair imitation of a blizzard over trails and ice-covered muskeg."

These picturesque incidents, picked at random from the report, show why it is stated, in the introduction, that "a campaign of this type must be a vital contributing factor in nation-building."

Improving Herds And Flocks

Building Up Dairy Herds And Flocks

On illustration stations operated by the Dominion Department of Agriculture as a part of the experimental farms system, considerable attention is being directed to building up dairy herds on the stations and to developing good types of livestock. The majority of the station operators are using purebred sires and many of the dairy and mixed farmers are keeping individual milk records and making butter-fat determinations in order to determine the production of each animal.

A study of the year production of milk and fat on the different stations has revealed the need of the adoption of improved methods. In his report for last year the supervisor of the illustration stations, published by the Department of Agriculture, at Ottawa, it is stated that the average production of butter-fat varies from 400 pounds to 121 pounds on the different stations. Indeed, on one of the farms it was found that the average yield per cow was only 74 pounds of butter-fat. These results show the need, and possibilities of systematic breeding and selection.

On many of the stations the herds and flocks have been so built up as to make them valuable sources of breeding stock for the farmers in the district. During the past year it is noted by Mr. Moynan, the supervisor, that the operators of illustration stations sold 260 head of cattle, 301 hogs, and 202 sheep for breeding purposes.

Was Servant Of Dickens
Elizabeth Eastdown, a former servant of Charles Dickens, died recently at Burnt House Farm, Higham, England. She was 82 years old. The only other surviving servant of Dickens is an 81-year-old page boy, who lives in London.

The earth's sensible atmosphere extends upward for about 100 miles.

"Is he really killing him?"
"No, he only pretends to do so."
"Then, why have we paid to come in?"—Hummel, Hamburg.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

WORLD HAPPENINGS BRIEFLY TOLD

Western Canada's visible wheat supply on November 15 of this year, showed an increase of more than twenty-five million bushels over that of a year ago.

The United States has notified Great Britain of its acceptance of January 21 as the date for the first meeting of the London naval conference.

Dr. Isai Sylvestre, said to be the oldest practising physician in Canada, died at his home in Sorel, Quebec, at the age of 83. He has been practising medicine since 1867.

The trip to the British West Indies of their Excellencies, the Governor-General and Lady Willingdon, while designed primarily as a rest and holiday, assumes also the aspect of a good-will journey.

Miss May Thornley, one of the best known temperance workers in Canada, is dead at the age of 71. She had been several times president of the Dominion Women's Christian Temperance Union.

The French government has sent its official acceptance to the invitation of the British government to participate in the five-power naval conference opening in London on January 21.

Leaders of the New Turkey have commenced to start observance of the Sabbath on the Christian Sunday instead of Friday, thus severing another of the ties which bind that nation to the Moslem world.

Honoring Dr. Augusta Stowe Gulen, the first woman to graduate in medicine from a Canadian University, the Medical Alumnae of the University of Toronto and other women physicians have had a portrait painted of her.

Meaning Of Totem Poles

Used By Indians As Monument Of Important Events

Boy Scouts and Girl Guides use the word totem without, perhaps, quite realizing its origin and meaning. Totem poles are used by many native tribes in various parts of the world as monuments of important events and tombstones of the dead. To the Alaskan Indians, however, the totem pole stands for the animal ancestor from whom he believes his tribe is descended, and it is connected with all his religious and social beliefs.

Substitute For Tunnel

A vast double dam across the English Channel between Deal, England, and Calais, France, carrying two railway tracks, an automobile road and providing a ship canal, has been suggested by Jules Jaeger, Swiss engineer, as a substitute for the proposed underground channel tunnel.

Farmer (on the track of poultry thieves): "Now, you 'ear what I sez, Joe. If anything moves you shoot."

Joe (dragged into the business): "Aye—an' if anything shoots—I move!"

Hubby—I've just paid the doctor the last money owed on his bill. Wifey—That's fine, dear. Now the baby's ours.

May Export Gas To United States

Alternative Proposition Is To Convey Surplus Gas From Alberta To Saskatchewan Points

While the special federal commission investigating the problem of disposing of the enormous surplus of Turner Valley natural gas has not reported, intimations are being broadcast that the report will favor export of the surplus to United States points south of the international border in Montana.

If the commission reports to that effect, there is sure to be a outcry from cities in Saskatchewan which are looking anxiously for a supply of natural gas from over the Alberta border.

The nearest market on the American side of the line is Great Falls, Montana, some 100 miles south of the end of the natural gas line from Calgary to Bow Island. Oil companies and gas companies producing natural gas who wish to market it argue that this is much closer than any possible market in Saskatchewan.

On the other hand, it is known that the British interests are drilling for gas in the Cypress Hills on the Alberta-Saskatchewan border line. Already one big blow has been struck there. If sufficient field is uncovered it is the intention of Rott and his associates to construct a 300-mile pipeline to Swift Current, Moose Jaw and Regina. This is not an excessive distance as the total mileage of the Calgary-Turner Valley-Bow Island system is already more than 200 miles.

Another factor is that if the gas was consigned from Cypress Hills to Moose Jaw and Regina, the Turner Valley surplus could then easily be used as another link of only about 40 miles between Cypress Hills and Foremost would tie in the proposed Saskatchewan gas distribution system with the existing Alberta system. Even though the cost might be somewhat more than the cost of exporting gas to Montana, it would mean that the immense Canadian natural resource of natural gas would be enjoyed by Canadians.

Big Mineral Discovery

Deposit Of Copper and Nickel Ore Attracting Attention To Saskatchewan

The whisper of a great discovery has gone out all across the Canadian west, and the representatives of mining organizations large and small are endeavoring to ascertain the spot in northern Saskatchewan where the Dominion Explorers, Ltd., are reported to have made what appears to be the mineral discovery of the current year.

Members of the Dominion Explorers Organization have been brought in from different areas and have been flying away in one fixed direction, and the indications are the discoverers will have themselves all fortified in regard to holdings in the new district before rival claim-stakers can appear.

Dominion Explorers being a Lindley organization, has had the experience of dealing with big mineral deposits. Sheritt-Gordon has been a case in point where the mineral bearing fractures extend possibly two to three miles in length. In regard to the new discovery in northern Saskatchewan, while officials have remained reticent, yet the size of the organization has rendered it difficult to prevent a certain amount of detail filtering out. Outstanding features now definitely known are the big width of the deposit and the particularly great length—the surface being a close duplicate of Sheritt-Gordon—with the exception that whereas Sheritt-Gordon is copper and zinc, the deposit located by Dominion Explorers is copper and nickel.

Samples of the ore from the new discovery have been examined. These samples having been taken from surface where gossan lies heavy and where work has not yet reached entirely below the leached zone are extremely impressive and something which would justify the discoverers in rounding out for themselves a holding of at least 15 to 20 square miles.

Pilchard Oil Shipments

Shipments of pilchard oil from the west coast of Vancouver Island are increasing yearly. One vessel recently took 650 tons in tow destined for Europe, where margarine is still staple diet. Sometimes whale oil is used as a substitute for pilchard oil in the manufacture of margarine.

The 1920 United States census shows that less than one in 2,000 persons in this country are blind.

Deer Park, near Copenhagen, consisting of 4,200 acres, is the largest park in the world.

Perfumes first were employed only in religious services.

If love is blind, jealousy is an eyepo-
pope.

Wheat Pool's Operations

Now Controls 65 Per Cent. Of The Grain In Western Canada

Although in operation for a period of only five years, the Canadian Wheat Pool controls 65 per cent. of the crop grown in the prairie provinces of Canada—Manitoba, Saskatchewan and Alberta.

It owns and operates 1,435 country elevators out of a total of 5,042 in the prairie provinces and, in addition, owns a large percentage of the large terminal elevators at Port William, Port Arthur, Vancouver, Prince Rupert and other points. The Pool has taken a leading part in helping to open up markets for Canadian grain in China, Japan and other countries, and has placed its handlings in over 60 different ports in Europe.

Recipes For This Week

(By Betty Barclay)

PUMPKIN PIE

- 1 cup steamed strained pumpkin.
- ½ teaspoon salt.
- ½ teaspoon ginger.
- ½ teaspoon cloves.
- ½ teaspoon cinnamon.
- 3 eggs.
- 1 cup canned sweetened condensed milk.
- 1 cup water.

Unbaked pie crust.
Mix ingredients in the order given; pour into pan lined with unbaked pie crust. Bake in a hot oven (450 degrees Fahrenheit) for about ten minutes, then reduce the temperature to moderate (350 degrees Fahrenheit), and bake for about thirty-five additional minutes, or until the filling has set.

May Have Started Something

Nebraska Fox Farmers Suing Airplane Company For Killing Foxes With Noise

Mail planes roared a few hundred feet over a Nebraska fox farm. Down below, scores of foxes covered in terror. Fifty-six of them died—and their owners are suing an aeroplane company for damages.

The outcome of the case will be watched with interest, because if the racket of airplanes kills foxes, and their owners can recover damages, there will be developments. Human beings are going to start collecting damages for nervous injuries caused by various modern noises.

Most of the noise caused by aeroplanes, and other things, is unnecessary. If it kills foxes, it must have a harmful effect on the health of citizens, who are, after all, almost as valuable. We are not "picking on" the aeroplane in particular; it is no worse than a dozen other noise-makers.

Some time or other, civilization must tackle the noise problem and solve it. Just now seems as good a time as any to start—Vancouver Sun.

Alberta Turkeys

High standards for turkeys are being maintained by the Alberta Bronze Turkey Association. It was reported at a meeting of the Association in Calgary the other day. The average weight of turkeys before the advent of the Association was 10 pounds. Now it is 12 pounds.

New Kind Of Frog

Have you ever heard of "estimating frogs"? Well, Captain Jenkins, well known Australian naturalist, says there are such animals in his country. These "estimating frogs" he says know when to expect droughts and they prepare by drinking enough water to outlast a dry season.

The Trans-Siberian railroad is 1,075 miles long.

Nearly one-eighth of the surface of Sweden is covered with lakes.

SUNDAY SCHOOL LESSON

December 1

THE CHRISTIAN HOME IN A MODERN WORLD

Golden Text: "Honor thy father and mother."—Ephesians 6:2.
Lesson: Matthew 18:3-9; Luke 2:40-52; 24:28-32; Ephesians 6:1-9; 2 Timothy 1:3-5; 3:14-15.

Explanations and Comments

The Development Of The Boy Jesus, verse 40.—Like every one who has ever lived, Jesus entered the world as a helpless infant, and like all normal children, His powers developed gradually. As a child He grew, and became strong, filled with wisdom; and the grace of God was upon Him.

"O that I may grow!"
What though Time cuts furrows in my face,
My heart may ever add grace unto grace.

Graces with added days still keeping pace,
O that I may grow!"

Matthew 18:3-9.—The D. Babcock.

Jesus At Twelve Years Of Age, verses 41-50.—When Jesus was twelve years of age his parents took Him to Jerusalem for the first time to attend the Passover. Three times in this chapter (verses 41, 42 and 48), Joseph is referred to as the father of Jesus. Dr. Garvie explains that "Joseph is rightly described as one of Jesus' parents, for the home he provided for and protected Him, filled a parent's place, and played a parent's part. To him also God had committed a trust and task. The Passover began on the fifteenth of Nisan, the first month, and lasted several days. It was a journey of eighty miles from Nazareth, their home in Lower Galilee, to Jerusalem.

When Joseph and Mary started home again, the Boy, unknown to them, tarried behind in Jerusalem. They went a day's journey towards Nazareth before they missed Him, for they had supposed Him with kinsfolk or acquaintances in the same caravan. They travelled in the company of many others returning to Nazareth and nearby towns, the boys and young men probably wandering together in groups, and the older ones by themselves, many of whom were riding mules. "I question whether there is ever pilgrims made from Jerusalem to the Jordan at the present day without a separate caravan of children and parents equally prolonged." — Thompson. They spent part of one day hunting for Him in the country, another day in going back to Jerusalem, and on the third day they found Him in the temple, listening to the teachers and asking them questions so deep that all around were amazed at His understanding and answers.

"Son, why hast Thou thus dealt with us?" his mother questioned, adding, "Thy father and I sought Thee sorely. How is it that Thou hast thus?" asked Jesus, surprised that they did not know where he had fled. "Now ye not that I must be in my Father's house?" Mary had said, "Thy father and I" meaning Joseph and herself, but Jesus spoke of His Father in heaven. His answer may indicate only a devout Jewish boy's interest in the temple, but it also indicates the sense of His divine sonship. His parents had failed to understand His words, but Mary did not forget them—she kept all these sayings in her heart.

"The Ring"

Gordon McLeod and His Company Again Visiting The West

Who Killed Maurice Meister, the shyest lawyer?

He was killed, there was no doubt of that, for it happened practically under the eyes of detectives. The Ring? But Scotland Yard said The Ring was dead. The police of America said he was dead. A master criminal, an expert in disguise, changing his appearance so that even his best friends, if he had any, couldn't tell him. Was he really dead or waiting his chance? Any of the characters on the stage might be the mystery man.

He had reason to kill Meister. The Ring's sister had been driven to suicide. When Meister ravell and shouted, was he merely insane and in delirium, or did he actually see something? Others, too, had reason to seek his death. The woman was a logical suspect. But a woman couldn't have done it. Why? Ask Scotland Yard. All these and a multitude of other questions are mixed up with the excitement of the present of crime thrillers. "The Ring", the play that made Edgar Wallace, famous writer of mysteries, a celebrity. It provides an evening of unexpected twists and turns, thrills and dramatic sensations.

For "The Ring" is coming. With Gordon McLeod, Lilian Chesterton, an original London cast and entire production, it comes to the Grand Theatre, Regina, on December 2nd, for a limited engagement of two nights only. It is one section of the season's bill of fare which will be a magnet for every type of theatregoer and one that is certain to attract an audience which will be a capacity one. "The Crooked Billet" will be given on Wednesday matinee and night.

With an increase of 8,000 last year and an increase of 67,000 during the period 1921 to 1920, the population of British Columbia is placed at 591,000.

Christmas Seals This Year

Are Christmas Bells

Send Them Out At This Season To Ring In Every Home

Ring out, wild bells, to the wild sky,
The flying cloud, the frosty night,
Christmas seals paid for seventeen
few clinics this year in Manitoba, and more.

Ring out old shadows of foul disease,
Ring in the nobler modes of life,
In 17 clinics, 2,104 "contacts" and "suspects," more than half of them children, were examined. 240 tuberculosis were found, 142 for the first time, and many other disease conditions.

Ring out the grief that saps the mind
For those that have we see no more.
Mankind needs a children's sorrow.
We have plans all ready, but—

Ring in the valiant man and free,
The larger heart, the kinder hand,
100 Christmas Bells, on 100 Christmas Letters, into 100 Homes, All For One Dollar. For Better Health In Manitoba. Set the Christmas Bells A-Ringing.

Caruso In Death

Friends Of Famous Singer Will Change Clothing On Embalmed Body Every Three Years

His public will see an immaculate Caruso even in death.

The famous singer's friends have decided to open his casket every three years and change the clothing, keeping his remains constantly dressed in the latest fashions as long as the embalming maintains the perfect state of the body.

The plan was revealed in Paris by Tito Chila, noted tenor.

Ever since his death, in 1921, the body of Caruso has rested in a crypt in Canessa tomb so that visitors may view it through the covering of the casket.

The Power Of Softness

Snow Bank Would Stop Bullet Which Would Penetrate Solid Substance

A bank of snow six feet thick will stop a bullet shot at the distance of fifty yards. The bullet will not penetrate that downy bank of snow, but it will go through the solid embankment when fired at three times the distance. The bullet shatters the steel, penetrates the solid bank; but the soft feathery snow has a way all its own, and it takes in that murderous land and loves it, and, as it were, sooths it.

Photos From Great Height

A new radio picture balloon which international meteorologists' polar expedition scheduled for 1932 and 1933. The photographs, taken automatically, will immediately be visible on the earth, it was stated.

New Airplane Propeller

Development of a reversible airplane propeller, tending to prevent nosing over in landing and aid to eliminate the ground loop menace, has been announced by the Richfield Oil Company. The new propeller weighs 30 pounds more than one of the standard type.

The pouch of the pelican is used as a scoop or dipnet for fishing.

The best way to make a peach cordial is to take her out to dinner.

A Secret Exposed

"Mrs. Sylvia Anna Tomlinson" the "great throat, cough, bronchitis, tonsillitis, croup, catarrh, quincy, and tonsil remedy. Good results every time. You can't lose, try it. \$1.50 post paid. Agents wanted everywhere."
KITCHENER TONISILTONS LTD.,
Kitchener, Ont.

LADIES WANTED TO DO PLAIN and light sewing at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars. National Manufacturing Co., Montreal.

PAINTS A VIVID WORD PICTURE OF NORTHLAND

Toronto.—A vivid word picture of Canada's new northwest development and a vision of great strides in transportation by air, land and sea that would centre about Churchill in northern Manitoba, marked the address of John W. Dufco, managing editor and vice-president of the Manitoba Free Press, before the Empire Club here.

Speaking at the club luncheon at the Royal York Hotel, Mr. Dufco told of new developments in Canadian transportation through the utilization of the northwest passage. With Churchill as the terminus of the new water route, a saving in freight rates and distance would be effected and the bonds of empire more closely drawn together.

With the growth of the great northern arteries stretching westward to the Pacific as new discoveries in air transportation rapidly follow one another, he foresaw a network of air lanes leading to Europe and Asia with Churchill as the greatest junction point on the North American continent. As direct results of the new water route, Mr. Dufco envisioned mighty shipments of grain moving through the northwest passage to the old world and return cargoes of Welsh anthracite coal that would find ready markets 500 miles from Hudson Bay and would eliminate importation of Pennsylvania anthracite.

Resumption of Canada's cattle trade with Great Britain, he stated may be brought about by the new route, where there would be a saving of 1,200 miles as against the Montreal route. "We have lost our cattle trade with Great Britain," he said, "and we may be shut out of the United States."

All importations into western Canada, he pointed out, could come via the new route to the carrying capacity of the British ships during the season. Great developments would also be effected in the Peace River district, "which will be nearer Liverpool by the new route than via the Pacific."

Named For Cattle Judging

Three Farm Boys To Represent Canada In Great Britain Next Summer

Toronto.—Three young farm lads, holding high awards in the cattle club contests of the Canadian National Railways at the Royal Winter Fair, have been selected to represent Canada next summer in the international cattle judging contest to be held in Great Britain in which they will contest for teams all over Britain and from the United States.

The successful boys, Clifford Baldwin, Barrie, Ont.; Cedric Kirkpatrick, Wrentham, N.B.; and Gordon Campbell, of Stewiackie, N.S.

British Cadets Coming

Will Attend Annual Meet In 1930 Of Canada Rifle Association

Ottawa.—Cadet contingents from Great Britain will attend the annual shoots in 1930 of the Dominion of Canada Rifle Association, which is the annual rifle competition, it was announced in a letter received by the Department of National Defence from Surgeon-Captain R. E. Hanson, honorary organizer of the Imperial Cadet Association.

The contingent of 19 cadets will be headed by Major J. M. West, Shrewsbury Officers' Training Corps, as honorary commandant.

Ask For British Control

Apla, British Samoa.—A petition requesting the King of England to take the control of Samoa from New Zealand, and to give it directly to England, was lodged with the administrator here for transmission. The petition was signed by 23 chiefs in behalf of the "Maui" organization of natives, which represents about 99 per cent. of the Samoans.

Occupy British Barracks

Welsbaden, Germany.—A battalion of French infantry has arrived here and taken over the barracks recently occupied by the British troops of occupation. Despite statements to the contrary, some quarters believed that the French intend to send detachments of troops to various places in Britain's former area of occupation.

Logging In B.C. Curtailed

Victoria.—Drastic curtailment of logging operations is being effected at most Vancouver Island camps, in concert with the reduced activity general throughout Oregon, Washington, and British Columbia.

W. N. U. 1813

Good Market For Wheat

Britain Will Purchase Grain Stored In Canada Says Expert

Toronto.—"In light of my experience in England and from reports I have received concerning the wheat supply in other countries, I see no reason why the millions of bushels of Canadian wheat at present in storage should not be sold at satisfactory prices before next year's yield," said W. A. Wilson, Canadian agricultural representative in London, England, upon his arrival here from the Old Country.

With an intimate knowledge of the wheat situation, Mr. Wilson did not hesitate to say that in his opinion the time had come when Canada's wheat, at present filling the giant elevators at different points throughout the West would move toward the great British market.

The Canadian agricultural representative declared that statistics he had been able to gather on the wheat supply throughout the world all pointed toward big purchases of Canadian wheat before the 1930 crop.

Royal College Of Physicians

Sixty Leading Figures In Canadian Medicine Meet At Ottawa

Ottawa.—The Royal Canadian College of Physicians and Surgeons came into being when 60 leading figures in Canadian medicine met here. The royal college was provided for at the last session of parliament, and has as its purpose the foundation of a standard of specialization in the medical profession. Toronto was chosen as the headquarters of the college.

Officers were elected as follows: President, Dr. John C. Mackinnon, Montreal; vice-presidents, Dr. F. N. G. Starr and Dr. Duncan Graham, both of Toronto; registrar-secretary, Dr. T. C. Routledge, Toronto.

The original charter fellows as designated in the act of parliament establishing the college comprise university professors in medicine in the nine medical schools in Canada. About 60 of these were present and were sworn in.

Heavy Air Mail

Thousands Of Letters Are Awaiting Opening Of Northern Service

Edmonton.—One hundred thousand letters are at the central post office in readiness for the opening of air mail service to the north country. It was estimated by F. X. J. Leger, superintendent of the Edmonton post office, a few days ago. The peak has not been reached yet as more first flight letters are being received here daily.

Three machines will in all likelihood be required for opening this service. Two of these would be extra aeroplanes for handling the large volume of letters sent here by first flight cover collectors.

Nothing definite has been settled as yet in regard to the date of opening the northern service, as this will start just as soon as there is sufficient ice on the rivers for the machines to land on skills.

Wolves Invade Moscow

London, England.—An invasion of hordes of wolves in the crowded suburbs of Moscow was described in a Daily News despatch from the Soviet capital. The despatch said that the wolves had attacked adults and children and had devoured two small children. Moscow's suburbs recently have been overcrowded with peasants who have set up temporary homes while awaiting permission to migrate to Canada.

Sale Of Coal Discussed

London, England.—Right Hon. J. H. Thomas informed the House of Commons that he had had a number of further consultations with coal and shipping interests concerned in the increased sale of British coal in Canada. These had raised a number of questions which would require careful consideration and consequently he could make no further statement at present.

Would Shorten Working Hours

Winnipeg.—The Dominion was requested in a resolution sent by Mayor Duane McLean, to take under consideration a plan to shorten the hours of working men in Canada. Details of the plan or to what extent the working day should be cut were not divulged. It is aimed to give employment to hundreds of men now out of work throughout the country, Mayor McLean said.

Would Retain Plant

Moose Jaw, Sask.—Recommendation that the Moose Jaw power plant be retained as a municipally-owned utility and opposition to its proposed sale to private interests, was voiced in the report to the Trades and Labor Council by a special committee. The report was adopted.

PROBLEM FOR LEAGUE CREATED BY MENNONITES

Ottawa, Ont.—Cable advices received from Geneva, Berlin and Warsaw indicate clearly that the exodus of refugee Mennonites from the Soviet republic, rapidly is assuming greater proportions and that while there has been no suggestion that Canada should consider taking more than 5,000 of them, the number that will have to find new homes somewhere in the world may reach the staggering total of 100,000 persons.

The 5,000 Mennonites who gathered in the environs of Warsaw a few weeks ago and concerning whom the Canadian government was approached by the German foreign office, appear now to have been but the advance guard of a constantly swelling stream of Mennonites. It is claimed that the entire Mennonite population of Russia, which has been increasing steadily for 150 years since the great Queen Katherine offered the sect sanctuary from religious persecution, will leave the republic. Within a few months upwards of 100,000 Mennonite refugees will have left Russia and will be seeking asylum in various parts of the world by the League of Nations or the governments of Europe.

Hon. F. Nansen, the head of the refugee commission of the League of Nations, has communicated by cable with the Canadian government. He has stated that the League will intervene in aid of the homeless Mennonites and he is confident that food and shelter can be provided in Europe and at the expense of the League until next spring.

This appears to remove any immediate danger of these people dying of exposure or starvation.

From what can be learned here, the Mennonites are not leaving Russia because of religious persecution, but because they claim that they have been reduced from a wealthy and thriving community to starvation by the exactions of the Soviet government. Their accumulated savings in money have been confiscated and their crops, each year, have been taken from them. They claim that there was no alternative except to stay in Russia and starve or to throw themselves upon the mercy of Europe, and for help assistance to establish homes for themselves in the western world.

As far as the immigration department here is concerned, the answer of Premier Anderson to Bishop Teweles is taken as being opposed to the movement of any Mennonites into Saskatchewan other than relatives of those in the province. Negotiations are under way with Manitoba and Alberta. Unless these provinces are willing to accept the Mennonites, the Dominion will decline to permit them to come.

It is felt that the League of Nations will carry the refugees over until spring and that there is plenty of time to consider very carefully the question of policy involved in bringing them to Canada.

Two Noted Authors Ill

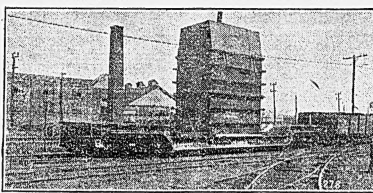

Conan Doyle and Kipling Unable To Fill Engagements

London, England.—Two of Great Britain's best known authors—Rudyard Kipling and Sir Arthur Conan Doyle—are in poor health.

The British Broadcast Corporation announced Kipling had cancelled a proposed radio speech December 12, because he had been ordered abed by his health.

Sir Arthur, driven abed by overwork at his home at Crowborough, in Sussex, has cancelled all engagements for the next few months.

To Aid in Industrial Development

The rapid development in power projects and other engineering work at widely separated points throughout the country has created a demand for rolling stock capable of handling unusually heavy and bulky shipments such as transformers, rotors, etc.

In order to take care of business of this kind, the Canadian Pacific Railway recently put into service two depressed center all steel flat cars which were designed by the Mechanical Department and built at the Angus Shops.

These cars are 53 feet 9 inches long inside the coupler knuckles. The center portion is depressed so that the height from the rail to the top of the deck is 2 feet 4 inches, and the portion which is available for loading is 22 feet 7 inches long.

The weight is 89,700 lbs., and they will carry a load of 225,300 lbs. Six wheel trucks with rolled steel wheels are used.

FLASHES GLAD TIDINGS

Ross Smyth, 22-year-old student of McGill University, Montreal, who is the wireless operator on the Fort James, who flashed back to civilization the news that the missing MacAlpine party was safe.

Over Three Millions Disbursed In Pensions

Latest Figures Show Canada Has 13,391 Old Age Pensioners

Ottawa.—On September 30, the last date for which figures are available, there was 13,391 old age pensioners in Canada, made up of 7,428 males and 5,963 females. Since the inception of the old age pension the sum of \$3,389,089 had been disbursed, the federal and provincial governments sharing equally in this distribution.

British Columbia, the first province to come within the operation of the act, had 4,214 pensioners and had disbursed \$1,520,652 in pensions. Manitoba, 4,391 pensioners, who had received \$801,155; Alberta, whose provincial enabling act became operative on August 1, 416 and \$14,516. The Northwest Territories, which is exclusively a federal scheme, had one male pensioner who drew \$51.63.

No payments have yet been made on account of the province of Ontario.

Alberta Election Rumor

Premier Brownlee Says Question Of Election Next Year Has Not Been Discussed

Edmonton.—Asked about the probability of the Alberta general elections being held in June of next year, as rumored in Calgary, Premier Brownlee replied that "it's nice to have matters of this sort decided for government without its having to deal with them at all."

The premier had no further comment to make, except to say that the question has not yet been discussed by the government in any way.

The former government in Alberta if it rides out its full term, need not go to the polls again until 1931, but Calgary rumor has it that it will do so next year.

Rob Quebec Bank

Montreal.—Three armed and masked men walked into the office of the Canadian Bank of Commerce at St. Charles, Que., about 30 miles from Montreal, tied the manager and cashier to chairs and escaped with cash estimated at \$500. The bandits, who had prepared their way by cutting telephone wires, drove off in an automobile.

Wants Official Delegates

London, England.—The British government despatched communications to Italy, France and Japan urging that those governments be represented at the five-power naval conference by civilian ministers rather than delegates chosen from the armed services.

Makes Definite Change Against Communists

Cause Of Unrest In Africa Says Minister Of Justice

Pretoria, South Africa.—The definite charge that the activities of the Communist Internationale are behind the widespread unrest among natives in the Union of South Africa was made in the course of a long address by Hon. Oswald Pirow, Minister of Justice.

Numerous organizations, closely allied with or at least in close touch with the Third Internationale, are responsible, the minister stated, for fanning the unrest which came to a head at Durban recently, when the government was forced to raid the native compounds and arrest 600 out of 5,000 natives who had refused to pay the poll taxes.

The minister also declared that unless the danger was checked strongly by the police, rioting on a large scale would be suffered within 12 to 18 months time.

Earthquake Shakes Liner

Vessel, 640 Miles Out At Sea, Receives Vibrations From Shore

New York.—The earthquake which was felt along the coast from New York to Halifax, recently, also shook the liner "Olympic," 640 miles out at sea, from stem to stern, her commander reported on arrival here from Southampton and Cherbourg.

It provided an alarming experience for the officers of the Olympic, for they did not know what had happened. They were afraid she had hit a submerged wreck and perhaps damaged her hull.

The vibration was so severe, he said, that it shook out the electric lights in the main room. Stewards and passengers rushed to the promenade deck to find out what had happened.

PREPARE PLANS FOR 1932 GRAIN SHOW AT REGINA

Toronto.—Laying their plans for the future, when the world's grain exhibition and conference will be held in Regina, Sask., July 25 to August 6, 1932, the executive and finance committee met here recently.

Under the chairmanship of Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan, the committee held a brief general discussion and announced several appointments of committee chairman and others who will aid in carrying out the extensive program. The grain conference, the first of its kind undertaken by Canada, bids fair to eclipse any similar undertaking of an international character.

Announcement was made recently that the appointment of judges for the exhibition will be along international lines.

The total prize list, official announcement of which will shortly be made, provides for all classes, an amount of \$201,500. Of this amount \$15,000 will be allotted to the hard spring wheat class alone, with \$2,500 the first place award.

Appointment was made recently of Dr. J. H. Grisdale, deputy minister of agriculture for Canada, as chairman of the conference program. Dr. Grisdale will name his own committee, which will attend to the securing of speakers, who will present papers at the conference.

F. H. Auld, deputy minister of agriculture for Saskatchewan, was appointed chairman of the exhibits committee, and L. H. Newman, Dominion cerealist, was named chairman of the awards committee.

Ernest Rhodes, B.S.A., of the Dominion Department of Agriculture, secretary of the 1927 world's poultry congress, was appointed secretary. The position during the earlier organization was held by D. T. Elderkin, manager of the exhibition, who now becomes a member of the executive.

S. Latta, former Minister of Education for Saskatchewan, was named publicity director.

His Excellency, Lord Willingdon, Governor-General of Canada, has consented to act as chief patron.

The personnel of the executive and finance committee is: Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan, chairman; Hon. W. R. Motherwell, Dominion Minister of Agriculture; Hon. A. Prefontaine, Minister of Agriculture for Manitoba; C. H. Hamilton, Dominion Grain Commissioner and former Minister of Agriculture for Saskatchewan; Dr. J. H. Grisdale, Deputy Minister of Agriculture for Canada; F. H. Auld, Deputy Minister of Agriculture for Saskatchewan; Dr. E. W. Whitmore, Regina; D. T. Elderkin, Regina; W. Yule, Regina; J. A. Mooney, Regina, and Ernest Rhoades, secretary.

RECEIVE WORD OF SAFETY OF McALPINE PARTY

Winnipeg.—A lone ace of northland flyers made a treacherous 200-mile flight to Fort Resolution, on Great Slave Lake, in the Northwest Territories, bringing the first word of the MacAlpine explorers to have been received in ten days.

Alone, Andy Cruickshank, pilot in the aerial relief expedition, under the command of Captain Guy S. Blanchet, arrived at Fort Resolution and reported Colonel C. D. H. MacAlpine and his party safe at Fort Resolution on the coast of Lead Bay, where they have been land-bound since Tuesday, November 12.

Without means of communication with the outside world, Cruickshank undertook the dangerous mission from Fort Resolution to ascertain landing conditions and to report the party's safe arrival at Reliance.

Radio reports received by the relief pilot were not assuring. To the south of Fort Resolution, along the 1,000-mile aerial trail to The Pas landing conditions are not favorable for the big 381-run-down plane of the Blanchet patrol, which is returning Colonel MacAlpine and his seven mates to civilization. Only a thin coat of ice covers the lakes where landings are to be made and he intends staying at Reliance, where the Dominion Explorers maintain a gasoline and food supply base, until there is a big improvement.

Rescued from Cambridge Bay, Hudson's Bay Post on Victoria Island, to where they had been guided by Eskimo hunters after long weeks of wandering on the barren lands, the MacAlpine men were returned to Bathurst Inlet, radio pilot of the Dominion Explorers, by Captain Blanchet and his aviators. Ten days ago a start was made from Bathurst and within a few hours Fort Reliance was reached, after a flight of 400 miles. Since then, the unfavorable weather in the north country has held them landbound.

Once at Resolution the next hop on the southward flight will be one of 400 miles to Stony Rapids. From there the party will fly to Cranberry Point, then to The Pas.

At Resolution the Canadian corps of signals maintains a station and it was from this point Cruickshank's arrival was flashed.

Sir Henry Thornton Honored

President Of Canadian National Railway Receives Decoration From King Of Norway

Montreal.—Sir Henry Thornton, president of the Canadian National Railways, has received an honor from His Majesty, the King of Norway, by being made a knight commander of the first class of the Order of Norway of St. Olaf, in recognition of the interest he has taken in Norway's immigrants coming to this country, and of his efforts to assist him in colonization matters.

This decoration has been presented to Sir Henry Thornton by Helmer Bryn, consul-general of Norway, on behalf of the Norwegian King.

Awarded Damages For Airplane Accident

Ontario People Given Compensation For Injuries Sustained

L'Orignal, Ont.—The first case in Canada in which damages were awarded to persons injured in an aeroplane accident was recorded here when judgment was entered before Mr. Justice Garrow, in the supreme court of Ontario, giving \$2,000 to Alva Lalonde, and \$500 to P. Charon, both of Rockland, as compensation for injuries sustained last winter when a "plane of International Airways in which they were passengers crashed.

Ocean Cables Broken

Several Connections Between America and Europe Severed By Earthquake

New York.—Six cable repair ships were groping the bed of the North Atlantic off the coast of Nova Scotia for cables broken by the recent earthquake along the western coast. Few or none of the connections between America and Europe were severed by the upheaval among the hills and valleys of the ocean's floor.

Royal Wedding Gift

Rome.—The wedding gift of King Victor Emmanuel to the new queen, Princess Marie Jose, of Belgium, will be the Chateau of Racconigi, in Piedmont, birthplace of the Crown Prince.

Lands Of Mystery

Labrador and Baffin Land Are To Be Surveyed From Air

In spite of many hardy explorers there are still quite a number of blank spaces on the map of the world. One of these areas is Baffin Land and the country "in back" of Labrador. This region is to be seen and surveyed by Commander Donald B. MacMillan next year. Commander MacMillan will use aeroplanes in this survey and plans to take many photographs. A land journey through such country would be so expensive both in money and in human endurance as to be almost prohibitive. In the long nine or ten month winter the snow and ice are very deep, and in the brief summer the growth of scrub pine is so dense as to make even foot travel impossible, except by wading through the streams.

Baffin Land and Labrador have long been lands of mystery. The Eskimos along the coast are mysterious enough in themselves, for they bear a marked resemblance to the modern Mongolian who lives half way around the world. Occasional treks into the hinterland have revealed strange races different from the Eskimo, some of which were said to be savage. The few white people who have settled along Labrador are curious, too. They have not prospered in any material sense, and their sojourn seems to have done them nothing but harm.

Labrador and Baffin Land are mysteries not only so far as their inhabitants are concerned; they long ago set the commercially minded guessing as to their natural wealth. Fish, of course, is a well established natural resource of Labrador, although the profits of the fishing industry do not as a rule go to the fishermen themselves, but to the Newfoundland middleman. Lumber is also there in profusion, but many of the trees are small, and the bad winter, coupled with the long haul, has prevented any important development. The fur trade is old and profitable. Then there have been grandiose schemes to extract wealth from this bleak and distant region, ranging all the way from gold mining to finding some use for the quantities of snow and ice. Silver fox farming, that highly uncertain industry, and reindeer raising have been attempted. The imported Norwegian reindeer soon blended with the native caribou, and the silver foxes appeared to be unable to resist the blandishments of their red brethren.

The MacMillan expedition may turn up something of real commercial value in this vast and unknown area. It may do even more by acquiring data of scientific importance. Scientists have been interested for a long time in the shifting weather in this region and have speculated on the possible effects these shifts may have on weather in the temperate zones.

Primitive Water Pipes

Hollowed Tree Trunks Used In London In Early Days Still In Good Condition

An interesting relic of old London has just been unearthed in the Strand. When workmen were excavating the subsoil to a depth of about three feet they came upon a length of the old hollowed tree trunk, which was used to supply the metropolis with water in the days before iron pipes. Elm trees were used on account of their power of resistance to damp, and many sections of these "pipes" which have been dug up from time to time in different parts of London have been found to be in almost as sound a condition as when laid down. These wooden water mains began to give place to iron pipes in 1810.

Storekeeper: "What kind of candy do you want, little boy?"
Boy: "Something ten for a cent so I can give my little sister one."

"Why do brunks always have so many railings and gratings?"
"???"
"So that the staff may get used to them."—Kasper, Stockholm.

Muffs Coming Back

Useful Article Of Feminine Winter Apparel May Be Seen Again

"The muff is coming back. A New York woman has appeared on the streets of Winnipeg, Manitoba, wearing one. Replying to cautious inquiry by a reporter she advised him that muffs are decreed by fashion for the coming winter."

That may mean little or nothing to the newer generation which regards muffs as relics of the time when women fainted and wore stays. But to the grey-haired man who remembers his muff for a momentary bit of warmth or comfort, it will be like meeting an old friend. The muffs of those days were generous affairs and constituted a sort of furry mine for coins and bits of candy by those who had staked a claim. No picture of a skating girl was complete without the muff pressed against her face to ward off the wintry breeze. As an aid to better understanding and promotion of the art of holding hands, the muff was in winter what the parasol was in summer and something better.

Up until the time of the Restoration in the seventeenth century, men wore muffs but women put them to rest, better use than mere protection for the hands that men gave them up and pretended to scorn them as effeminate. Modern woman may decline to return to long skirts and a corseted waistline, but it is at least not inconceivable that she will restore the muff to favor. The modern muff is small, not much larger than a double mitten, but the size is really immaterial.—St. Paul Pioneer Press.

A Windowless Office

Engineer Works Out Plan Of Lighting By "Silly Scheme"

Northern exposure so eagerly sought after by artists will be a thing of the past, if the experiments of Frank E. Hartman, noted Chicago physicist, are successful. Windowless buildings is the theory upon which he is working.

The practicality of the idea will be tested in an experimental laboratory which itself will be windowless. Substituting for windows will be small outlets along the outer wall and near the ceiling through which reflectors will project the sun's rays and flood the room with sunlight and sky blue.

According to Dr. Hartman, windows are wasteful of heat, distract attention of workers in offices, are inefficient for ventilation and a costly part of the architecture of a building. They are but a necessary custom in these days of high buildings where only the topmost windows derive any advantage from the sun, he claims.

The Dollar That Counts

The crash in the stock markets is not an unmitigated evil. It will release a lot of money for legitimate business that has been tied up in margined stocks. It will also teach a lot of misguided individuals that money picked up over night can also disappear with equal despatch. The dollar that really counts with the country as well as the individual is still the one that is earned by the sweat of the brow.

Just a Fish Story

He was an angler, with the usual imagination.
"Yes," he said, "it was the biggest fish I have ever hooked, and before I realized it I was pulled right out of the boat."

"You must have got a nasty wetting," remarked one of the listeners.
"Oh, not a bit of it," replied the angler. "You see, I fell on the fish."

Pearls found in the common edible oyster are of inferior quality.

Each stem of the wild poppy has from 10,000 to 60,000 seeds.

THREE WESTERN PIONEERS

Here they stand on the bank of the famous lake that Tom Wilson discovered. They are Mr. Wilson, first white man to set eyes on what is probably the most beautiful body of water in North America, Lake Louise. Mrs. John McDougall, first white woman in southern Alberta, and widow of famous pioneer missionary of that province; and Ralphine Harvey, first white girl born at Lake Louise, standing between the two. This unique picture of three Alberta pioneers was taken recently on the shore of Lake Louise.

Success Means Hard Work

Experience Of Centuries Proves There Are No Short Cuts

In a leading article headed "Advice to the Young," the London Daily Mail says: Sir Charles Wakefield gave admirable advice when he declared that, in all his experience in every part of the world he had never found a man who had succeeded in life without hard work, and a capacity for taking pains. In these days many specifiers are offered for success, and soft opinions are made dangerously attractive. Yet the experience of centuries teaches that the most valuable lesson a young man or young woman can learn is that there are no short cuts to success. Brains are not enough; combined with a power and love of hard work they are, barring accidents, irresistible. It would be hard to find a single instance of a man or woman who has reached the heights of any profession or business who has not from early life worked harder than his or her contemporaries. Nobody gains the palm without the dust. Youth should remember that all the great positions of today must be filled by them tomorrow.

Increased Use Of Milk

45,625,000 Gallons Of Fresh Milk Consumed In Canada Each Year

Statistics have shown that Canadians eat more butter and eggs per capita than the people of any other country. A recent survey made by the Canadian Federal Department of Agriculture shows that one of the favorite beverages of the people of Canada is milk. To satisfy the demand for fresh milk alone takes 45,625,000 gallons a year or about one pint per head of population per day. This increased use of milk has been brought about largely not only by a better appreciation of the value of this product in the diet, but also by the improvement that has been made in its production and general handling.

Dairying is one of the most important industries in Canada. The total annual value of dairy products exceeds \$250,000,000.

Water of the Dead Sea is five times as salty as that of the ocean.

As out of date as 1929 model automobile in 1929.

Assembly At Geneva

Is Like One Family

Opinion Miss Agnes MacPhail Has Of League Of Nations

"I felt I had come to join a big family to which I had belonged for a long time, but which, I'd never really known, a family with a sense of unity, where similarities were magnified rather than differences," stated Miss Agnes MacPhail, M.P., during an address in Toronto recently under the auspices of the Women's International League.

"Certain personalities stood head and shoulders above all others," continued Miss MacPhail. "There were Ramsay MacDonald, Lord Robert Cecil, Premier Briand and Herr Stresemann, the Minister of External Affairs in Germany, the latter probably the greatest of them all. He had a compelling quality that arrested the attention of all. He was a man who had suffered for his ideals, which he had carried through the valley of unpopularity to the goal of popularity. He was a very great man. World peace was the guiding light of his life. His speech was a moving speech for our knowledge that he was a dying man added much to its gripping power. MacDonald said: 'We must be prepared to take the risk of peace,' and that is what Stresemann did. He gave his life completely for his cause just as truly as if he had been killed on the battlefield."

"Brand was the orator of the gathering. He used no notes and he aroused the assembly to a furor of enthusiasm."

"Probably the most outstanding thing during the assembly," continued the speaker, "was the signing of the optional clause by so many countries. While we have not actually reduced the amount of money spent on armaments, rather increased it, the world is travelling away from the idea of security based on force to security based on law or arbitration. A general act now provides for settlement of differences by conciliation, arbitration, or judicial means. Briand had advocated a United States of Europe. 'I believe something I'd like to be done eventually,' she concluded."

The Most Used Word

Check Shows "I" Heads List In Telephone Conversations

An enterprising man once decided to check the use of various words used during telephone conversations and discovered that the word "I" was used almost four thousand times out of a total wordage of less than 80,000. The word "You" was the next most frequent, while "the" and "a" followed in the order named—although the tiny "a" was used only a trifles over half as much as the all-important "I." This does not agree with printed English where "the," "of," and "to," "at," "in," "that," "it" and "is" all lead "I." In fact, out of 80,000 words of printed English, the word "I" appeared less than a thousand times, while "the" appeared almost 6,000.

The "I's" have it—on the telephone, at least.

Dominion Farm Loan Board

Up to the end of October the amount of money extended to applicants in loans by the Dominion Farm Loan Board was \$1,500,000. In all, 8,223 applications for loans have been completed by prospective borrowers and forwarded to the provincial branches.

A total of thirty-one head of short-horn cattle are being brought from Britain for the Prince of Wales ranch in Alberta this year.

No true vipers are found in America.

When Winter Comes

Excellent Work Accomplished By Red Cross Society In Alberta

(By Mrs. M. H. Conquest)

In many northern homes in the province of Alberta, when winter comes it finds the settler unprepared for the rigors of the cold season. One of the faults found by the immigrant with their Canadian conditions is that they were not aware of the type of clothing most suitable for the climate.

The baby born in weather that is forty below needs very careful handling, and a warmth that an English layette of cotton material cannot supply. One of the best services which the Red Cross is rendering the New Canadian is to act as friend and adviser to the mother with the new baby in her arms.

By means of the Society's regular weekly broadcast, known as "The Friendly Hour," Red Cross is brought in touch with numerous people who are strangers to the Canadian winter, and need a little advice and first hand information regarding the clothing and clothing of their families. Here is where the Red Cross acts in her capacity as Greatest Mother, and to the poor and needy settler is able to ship out a warm comfortable baby outfit, made by the friends of the air who listen in regularly.

The latest innovation has been to add a warm patchwork quilt for the mother herself, and in many a log cabin in the far north may be seen these cheerful red-lined comforters, the work of many women listening in at some distant point, and sewing the whole for their less fortunate sisters. Thus does "the quality of mercy" bless her who gives and her who takes.

Over Confident Pilots

Cause Many Accidents

Survey Shows Twenty-Hour Mark Is Most Dangerous

Human infallibility has caused more tragedies in naval aviation during the last eight years than imperfections of planes, and the dreaded "tail spin" as a form of accident sent more men to their death than any other danger which lurks in the air. The U.S. Navy Department has announced after two years' study.

The most dangerous period for a pilot was revealed by the survey to be the 20-hour mark. It is then he begins his involved manoeuvres. Flushed with overconfidence, he is rash and often takes chances which result fatally.

Engine failure, popularly believed to be one of the most prolific sources of air accidents, caused only one total crash in the navy during the eight years surveyed, it was said.

"Tail spins" were blamed for 80 per cent of all accidents. Of these 80 per cent occurred while the plane was less than 200 feet up.

Consumption Of Cigarettes Increasing

One hundred cigarettes yearly for every man, woman and child in the United States is the current rate of production in the American tobacco industry. A statistical examination of the industry, sponsored by Clark Dodge and Company, indicates that the American public will pay more this year for little white rolls of shredded tobacco than for national defence. The total amount is estimated at \$850,000,000 for 1929. Other authorities have estimated as high as \$1,000,000,000.

"Are you going to put in an oil burner for your furnace next winter, as you were talking?"

"No. I get so many motor cars and other circulars in the mail now that I believe I can heat the house with them."

The Suez Canal has no locks. It was originally 26 feet deep, but has been deepened to 40 feet.

Pulp Industry In Sweden Increasing

Produces Six Per Cent. Of All Newsprint In World Market

In an article on the pulp and paper industry of Sweden, by Hans Amdin, the secretary of the Swedish Paper Mills Association, some interesting facts about the origin and prospects of that industry are given.

While Sweden began to exploit its forest-wealth commercially as long as 400 years ago the woodpulp industry in Sweden is somewhat over half a century old and has shown continually and rapidly rising figures from 62,000 tons dryweight in 1886 to present production of more than 2,000,000 tons.

The pulp mills are principally located in the northern parts of Sweden, where the timber is easily accessible and where the waste products of the big sawmills can be directly utilized, which makes possible an economical and rational utilization of the wood.

The paper mills, on the other hand, are situated in the central and southern districts, since the supply of cheap waterpower, the proximity of ice-free harbors, and good communications in general are primary considerations of these mills, many of which are direct descendants of the old Swedish "hand mills," which began the manufacture of paper from rags 400 years ago.

The Swedish production of paper and cardboard has grown from an annual average of 86,000 to 610,000 tons in the last 30 years, and the manufacture and export of newsprint has grown to be an important item in the list of Swedish staple exports, so that Sweden now produces 6 per cent. of all the newsprint in the world market.

As regards the future of the Swedish paper and pulp industry the author points out that the recent national assessment of Sweden's forests has definitely shown that, thanks to the traditional and sound forestry culture policy, there is a gratifying balance not only in the timber supply but also in the annual growth in comparison with earlier estimates.

It is therefore safe to say that on the firm basis of a practically inexhaustible timber supply and of Swedish manufacturing technique Sweden wood-pulp and paper will hold its own in the international market. In addition to this new Swedish methods promise the future use of by-products of pulp manufacture, such as sulphite alcohol, yeast, sugar and concentrated cattle feed.

According to a recent figure 40 per cent of all the cellulose now sold in the world comes from Sweden.

Says Slavery Still Rampant

Charges Made That There Are Two Million Slaves In China

Charges that there are 2,000,000 slaves in China, many of whom were seized and sold from the British island of Hong Kong, are contained in a book entitled "Slavery," written by Lady Simon, wife of Sir John Simon, chief of the commission investigating conditions in India.

She says that many Chinese girls have been sold into slavery and never heard from again and that at least 10,000 children in Hong Kong work under a system of bondage amounting to slavery.

Although the system of slavery was theoretically abolished by law in 1926, Lady Simon estimates there are between 4,000,000 and 6,000,000 slaves in the world including those of China, Arabia, Abyssinia, Liberia and Central Africa. She says she wrote the book in the hope of arousing concerted action to end the bondage.

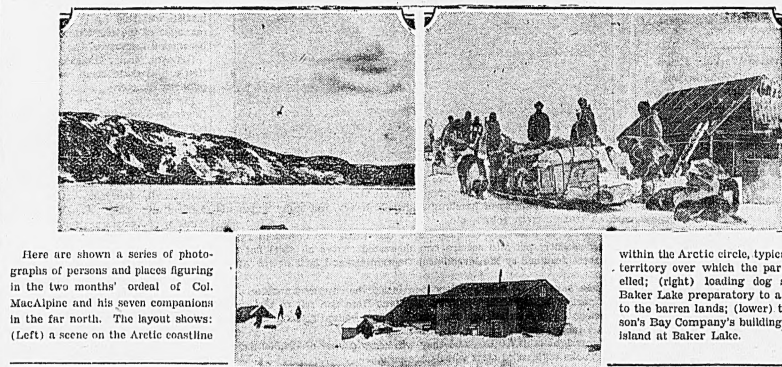

Had A Wild Streak

Captain Oriebar, a British speed demon, who recently flew in that wonderful new plane at the rate of 368 miles an hour, is said to be about the best croquet player in England. We know there was a wild streak in him somewhere.

"I am sorry I can't pay my instalments this week."
"But you said that last week and the week before."
"Yes, and didn't I keep my word?"

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrell, the elegant girl, but he doesn't know it. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend. She and Perry take the child Al adores and sail for France. Al, completely broken by the loss, disappears from Broadway and becomes a derelict. One day, Grace Farrell sees him on the street, but he runs away. Grace starts a search for him, which ends in failure. But the image of Grace remains vividly in Al's mind.

CHAPTER XXIII.

Something of Al's old generous spirit toward Grace returned as he thought of her. How concerned her expression had been yesterday as she stared at him from across the street. Yet his feeling toward her was not strong enough to overcome the resistance of his desire to separate himself from the old life.

In spite of all that, however, the memory of her face remained in his mind. Perhaps it was this memory that brought him up sharply about three o'clock one morning before a house that seemed strangely familiar. Surely he knew these outside steps and that entrance. It was Blackie Joe's place.

Slowly, scarcely knowing what he was doing, Al mounted the shabby stairs toward the little sign of his head above the door. Yes, he was sure of the place now; an intense longing possessed him to see the inside of the old familiar place where he had won his earliest triumphs. Only a few years had passed since those happy-go-lucky nights, but the time seemed like a century.

He stopped before the heavy, bolted door. A new door, much stronger than the one Al had known. The new marks of the prohibition agents had forced Blackie to take additional precautions; his place was better hidden now.

He knocked against the panel set high in the door and presently opened. A strange face gazed at him, and the eyes became more suspicious. Every moment, as their owner looked him up and down, noting his dilapidated clothes.

"Is Blackie Joe here?"

"Who wants to know?" asked the man behind the door.

"I do. I know him."

There was a pause, then: "G'wan, beat it! He's got no time for the likes of you!"

The panel closed with a slam. Al, nodding listlessly, began to descend the stairs. He shrugged his shoulders—it didn't matter.

"Blackie Joe had been standing fairly near the door. 'Who wants

me?" he called, after the aperture was closed.

"Oh, just some bum," said the door-keeper scornfully.

Blackie nodded and turned to look over his dance floor. But as he did so there was a faint stir of curiosity in his mind. A bum—well, what did the bum want?

He walked over to the door and pulled open the panel. At the foot of the stairs, clearly silhouetted against the light, he saw a familiar face.

At first Blackie did not recognize the figure at the foot of the night club stairs as Al Stone, his old singing waiter. But the familiarity of the profile was striking enough to make Blackie throw open the door and call: "Hey—yout!"

At that, Al turned, so that his face was illuminated by the light at the head of the stairs. Now Blackie was sure—he came rushing down the stairs to bring Al's hand.

"Hello, there, kid!" Blackie almost shouted in his delight. "We've been wondering where you were. And to think—I almost let you get away!"

Al stared into the face of his former boss, smiling faintly. It seemed as if Blackie would never relinquish that vigorous grip on his hand. A thrill of pleasure shot through Al—it was good to see someone at last who was really glad to see him.

Blackie led him in the most friendly way imaginable. That hadn't happened to Al for months. He glanced away to hide his embarrassment at his shabby appearance.

Then Blackie linked his strong arm within Al's and led the young songwriter up the stairs, talking as he went.

"You know, Al, this is a big moment for us all. I want you to come in and meet the performers—some of them you know. And Grace is still with us—you remember her."

Al nodded, but said nothing. Blackie saw he was dealing with a man who was not only bewildered, but had definitely lost his grip for carrying on in the battle of life. The arm inside Al's coat sleeve was limp.

As they stepped inside the door-keeper stared in amazement to see his well-dressed employer walking arm-in-arm with this bum. "What on earth did I mean?"

It was well on toward daylight and only a few customers remained in the main dining-and-dancing room.

"Come back to my office," suggested Blackie. "We'll have a good talk."

But Al stopped, scanning the familiar room as if he expected to find the ghosts of his former triumphs there. His eyes took on the look of concentration that is habitual with men who try to escape the world and commune only with themselves.

He forgot that Blackie was standing beside him, looking solicitously into his face. "Yes, there was the table where Molly and Marcus and the others sat on the night he sang 'Always' to Molly. There was the old door leading to the bar. The floor show had ended, but the orchestra was playing and a few couples were dancing.

"Come," repeated Blackie, and Al followed him toward the private office.

They sat down, facing each other. "Have a cigar, have a drink," suggested the night club owner, but Al shook his head. Then Blackie began again:

"Now, boy, I wish you'd tell me all about it. What happened to you—where have you been hiding out all these months?"

"Oh, here and there—just wandering about," Al replied, noncommittally.

"Yes, I know that. But do you know that Marcus has been after you? And a couple of song publishers have been paying you all over town."

"Yes, I know it, came the strange,ly passive answer. "I'm not interested in all that. I told Marcus I was through and I meant it. I really don't know why I came here tonight—just happened to look up and saw your entrance. Couldn't stay away from the old place forever, I guess."

A hopeless feeling stole over

Blackie. This was just the shell of the old Al; Blackie felt how strong that apparently listless resistance of his would be to any come-back. Nevertheless, he leaned forward and said earnestly:

"Al, you don't have to tell me how you feel—I know. It was so strange to you, but I was knocked out once myself. In the same way, by a woman. For a while I thought there was no use living; then the day came when someone gave me a good stiff talking to. I decided to fight my way up again, and I did. I decided I wouldn't let one blow put me down for the count."

"Blackie, the reformer," murmured Al. An expression somewhere between a smile and a sneer curved the corners of his mouth.

Blackie leaned back in his chair, hurt, but determined not to show it. In the old days Al could never have made a sardonic and bitter rejoinder like that.

"Do you still love Molly?" Blackie asked incredulously.

"No!" The sharp denial was the first show of life Al had shown. Blackie nodded in approval. Then Al seemed to think that some further explanation was needed. "She'd do for me and I had to clear her out of my mind. I did that—then I tried to write. But I found I couldn't get interested. It was no use."

Just then a waiter struck his head in the door and told Blackie a customer wanted to speak to him. Blackie rose.

"Excuse me a minute, Al. Make yourself at home—I'll be right back."

(To Be Continued.)

BABY'S OWN TABLETS A HELP TO MOTHERS

There is no other medicine of as great a help to young mothers as Baby's Own Tablets. These Tablets are a mild but thorough laxative which relieves the bowels, sweetens the stomach, corrects constipation and indigestion; break up colds and simple fever without the cutting of teeth pained.

Mother who make a box of the Tablets in the house always feel safe from the sudden attacks of illness that seize their little ones. If Baby's Own Tablets are given on the first sign of illness the baby will soon be right again. Concerning the Tablets Mrs. B. G. Carver, Lyndale, P. E. I. writes: "I always keep Baby's Own Tablets in the house and find them a wonderful help in keeping my baby well."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Workers Helped by Science

One Detector Located New Body and Furnished Work For Discharged Miners.

The practical ways in which science helps working people is demonstrated again in England. A lead mine in Derbyshire had "petered out." Two young schoolmasters invented an ore detector, just about the time "buried" miners had been discharged.

With the detector they located a new lead-ore body, 1,000 feet under the surface. They figured it was worth about \$250,000. The mine owners, having faith in science, put the miners back to work again, located the ore body through a tunnel and now the mine is working full blast. Potentials continually promise miracles to help working folk. Science performs the miracles.—Vancouver Sun.

Wonderful For Indigestion!

When your stomach feels bad, when Gas, Sourness, Nausea or after-eating pain make you feel miserable—a single dose of pure Bismuth Magnesia will bring about instant Relief.

For Indigestion, the prompt effectiveness of BISMUTH MAGNESIA is really wonderful. Even the most obstinate cases quickly respond. Pleasant and inexpensive to use. Ask your druggist.

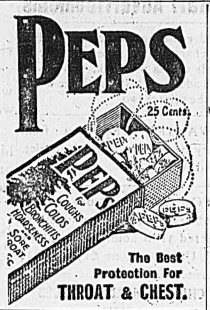

Child Marriages in India More than 25,000,000 girls under the age of sixteen are married in India. Out of this number more than 2,500,000 are under the age of five years and 2,000,000 under ten years of age. India has 15,138 widows under the age of fifteen.

Eight of London's churches contain work of the fourteenth and fifteenth centuries.

HEADACHE RELIEVED QUICKLY

CARTER'S This Pure Vegetable Pill quickly corrects the digestive disturbances, removes the intestinal poisons, and sick headache quickly disappears. Your whole system enjoys a tonic effect, constipation vanishes, and you feel a renewed vigor. Avoid broods and dopes, they are depressing and harmful. All Druggists 25c and 75c red pills.

CARTER'S PINK PILLS

Old Eskimo Culture

Thousands Of Wonderful Specimens Found In Northern Alaska

Another chapter in present-day knowledge of a "golden age" of Eskimo culture, more than a thousand years old but newly discovered, has been added by Henry B. Collins, Jr., Smithsonian scientist, on his return from a five-month exploration of Northern Alaska. Buried in an arctic "messa" of refuse, but up 20 feet in the centuries of existence of a thriving village in the south east end of St. Lawrence Island, he found rich material of the most ancient and highly developed Eskimo culture known.

Thousands of specimens of ivory and bone implements, weapons, ornaments, pottery, and wooden artifacts were also found. Centuries ago a village had been reared on the flat tundra of the beach, he said, and as kitchen refuse accumulated, old dwellings were abandoned and new ones raised on the artificial foundation. How long the process kept up no one knows. The "messa" now frozen solidly for its total depth, grew higher until, in 1878 and 1879, rich and epidemic wiped out the native population.

Through the 20-foot layer the scientist traced the old culture, an art discovered in 1828 by Dr. Alex. Hrdl, noted Smithsonian anthropologist, and Diamond Jenness, of the National Museum of Canada.

Implements and ornaments are distinguished by graceful, sweeping lines of decoration, an art that makes modern Eskimo work mechanical in comparison. Some objects are so old that their use is unknown to the present-day native. It is a peculiar and rich culture," Collins said, "strange because the farther back we drive, the richer it gets. Modern Eskimo art, in contrast, is in a degenerated state."

"The ancient materials suggest strongly that the original home of Eskimo culture lies in the west, in Alaska or northwestern Siberia. The culture is distinctly older than the oldest found in Canada and Greenland, a significant fact. 'We are after the illuminate origin of the ancient art. There is no explanation for its fading out, except perhaps the introduction of the use of iron, with which the later and more decadent ornamentation has been fashioned.'"

Some Human Ostriches

People Have Earned Living By Swallowing All Kinds Of Articles

There are on record amazing feats of people who can swallow almost anything with absolute impunity, who glory in it, make a map of it, and some who even earn a livelihood by it.

A Stratford, England, telegraph operator died some years ago in the Essex County Lunatic Asylum from asphyxia. He had swallowed stones, grass, leaves, wood, and scrap-iron.

Even more voracious was the individual who died at the London Hospital at a later date, and who gloriied in the title of "The Champion Ostrich."

He had in him forty pieces of cork, thirty pieces of tin foil, nine pen-knives, one iron ring, three pieces of leather, a leather strap, 9 inches long, 12 inches of string, with bits of cork attached, and an immense quantity of other lengths of string, cotton, and paper.

Another human ostrich made his stomach a veritable chest by consuming over two pounds of broken lamp chimneys, nails, tacks, screws, and tumblers.

Could Wolf Believe It

An old lady, up from the country, stood in a busy thoroughfare, looking at the ceaseless stream of traffic, then at the notice, "Pedestrians cross here."

"Humph!" she was heard to mutter; "and I shouldn't blame 'em if they were downright angry."

She: "What would you do if I should cry?"

He: "Hang out a sign. 'We Pout!'"

Minard's Liniment relieves stiffness.

Long-Lived War Leaders

Four Who Bore Heavy Burdens Have Become Octogenarians

For months before his death Stresemann was a man broken in health, anxiously watched by relatives, friends and physicians, kept to a rigid diet, sent to bed early—he was an invalid. Indeed, ere he had reached his fiftieth birthday, Hindenburg, on the other hand, celebrated his eighty-second birthday, which fell on the day before Stresemann died, by going on a hunting trip, which was cut short by the Minister's death.

Ten years of peace killed Gustav Stresemann; three wars—one the most terrible in history, in which he was the supreme leader on one side, have proved insufficient to lay Paul von Hindenburg low. Can it be that we have heard far too much about the terrors of war, far too little about those of peace? It would seem so—at least in so far as the longevity of war leaders is concerned.

Today, fifteen years after the outbreak of the World War, and eleven years since its close, there are four men who can proudly boast that, despite having borne heavy burdens of leadership between 1914 and 1918, they have nevertheless become octogenarians. Hindenburg is one—of the others, two are military men, Joffre and Mackensen—and the other a civilian who was at the head of his country's war-time government at a time of acute crisis—Georges Clemenceau.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Using Steam From Volcano

Steam issuing from fissures in the earth near the main crater of Mount Etna will be the motive power to supply the central heating plant of the volcanological observatory on the higher slopes of the mountain, Professor Gaetano Ponte, director of the Etna observatory, said.

A Timely Question

The Lehigh Herald asks: "How shall we address women senators? Will it be Mrs. Senator Smith or Senator Mrs. Smith, or just plain Senator Smith?"

Stop falling hair with Minard's Liniment.

Many a grafter has built a fortune on a steel foundation.

Japan, with territory now crowded, added 900,000 to her population in 1926, and 1,000,000 in 1927.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

The subscription rates, to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line.

Heard About Town

Wm. Leith returned last week from Lacombe.

There will be a dance at the Flaxland school on Friday evening, November 29.

The Chummy Club met on Wednesday evening of last week with Mrs. Harry Lloyd.

Mrs. Pihlaga left last week to visit for a short time with her married daughters in Springfield, Ill.

Robt. Morrison and S. H. Smith attended the funeral of John Jones at Youngstown on Friday.

The dance on November 22 in Peyton school in aid of the Xmas tree fund was quite a success, and was well attended in spite of bad roads and dances at Clemens and at Chinook.

On Tuesday we had in this district a light rain storm, lasting all day, causing the best part of the snow to disappear. However, on Wednesday there came another snow storm. We welcome the moisture.

CROCUS LODGE, No. 115,

Heard About Town

H. D. Stewart, of Saskatoon, spent the Thanksgiving holidays with his parents, Mr. and Mrs. R. Stewart.

Order your Xmas greeting cards early. Our stock is complete and better than ever.—E. E. Jacques.

A program is in preparation for the entertainment and dance to be held in the Laughlin School on December 18.

Mrs. R. L. Stout left on Monday morning for Alsask, having received word that her daughter was ill in the hospital.

Mr. and Mrs. Ed. Donaldson, of Attlee, visited this week at the home of her parents, Mr. and Mrs. Paul Seager, of Kimmund.

Jas. Ferguson and S. W. Warren returned on Sunday morning from Edmonton, where they attended the municipal convention.

Mr. and Mrs. W. A. Todd and daughter, Mae, were dinner guests on Sunday evening at the home of Mr. and Mrs. S. H. Smith.

The Collholme Nazarene Sunday School will hold their annual Christmas entertainment on Monday evening, December 23. Keep that date open.

The Ladies' Card Club met on Tuesday evening at the home of Mrs. Oscar Nelson. The prize, a lovely hand embroidered luncheon cloth, was won by Mrs. W. S. Lee. The club next week meets at the home of Mrs. M. L. Chapman.

The Chummy Circle had Miss Emes, school teacher, as hostess, on Wednesday evening of this week. The members of the club enjoyed a long tramp into the country. Upon their return to town refreshments were served at the home of Mrs. C. W. Batton.

On Sunday evening after the services in the United Church a meeting was held for the purpose of re-organizing the choir. Mrs. W. W. Isbister was selected organist and A. V. Youell leader and assistant organist. Thursday evening of each week was set for practices.

Collholme Happenings

N. D. Stewart is a Calgary
visitor this week.

Miss J. Morrison is visiting
with neighbors for the past
week end.

A. Spreeman recently tested
his new McCormick engine
and crusher, and report both
satisfactory.

Jimmy Wilson, Jessie Mac-
Kinnon and Dan Schmit have
been ill lately and unable to
attend school for a few days.

Rev. Mr. MacDowell makes
a trip every Sunday from
Youngstown, via Chinook, to
the Collholme church to con-
duct services. In such weather
as this, does it not seem reason-
able that he should live in
Chinook?

The Collholme school pupils
seem very ambitious and en-
ergetic in making snow men. If
you doubt this statement, go
and see the latest specimen
turned out. He measures six
feet from stem to stern and
three and a half feet across.
We wonder if they are as
energetic in their studies.

Items of Interest

In a recent month 11,400
pieces of marmot skins were
exported from Tientsin, China.

While droughts have been
doing damage to some parts
of India recently, floods have
taken their toll in others.

Impurities in radiator water
have been found to be a major
factor in reduction of power
because they are deposited in
the tubes and connections
according to engineers.

The twinkling of stars is
caused by the continual and
frequent refraction of light
waves as they pass through
the layers of atmosphere which
vary in density and tempera-
ture.

Heard About Town

Mr. and Mrs. Ralph Greene
and daughter, Miss Mary, of
Sedalia, were Chinook visitors on
Tuesday.

Peyton Christmas entertain-
ment and dance will be held at
the School on Monday evening,
December 16.

J. G. Connell and Mrs. Connell,
who had been spending a few
days in Edmonton, on Saturday
morning returned home.

C. E. Neff, who has been at
Medicine Hat and Calgary for
some weeks, returned on Wed-
nesday. Mrs. Neff will return
shortly.

Mr. and Mrs. R. Mart, who
have been conducting the Acadia
Cafe, for the past few months, left
on Wednesday morning for
Calgary.

The Women's Institute will
meet with Mrs. Jas. Massey on
Wednesday, December 4, at 3
p.m. Roll call—"Suggestions for
home made Christmas gifts."

Don't forget the dance which
will be held in the Chinook
School on Friday, Dec. 6. Pro-
ceeds will go towards the school
Xmas tree. Everyone welcome.

A. J. Mumford, who represents
Osler, Hammond and Nanton,
Ltd. Winnipeg, in this district,
will leave for the head office of
the company on Saturday morn-
ing. He expects to return in
April.

The Curlers' dance on Friday
evening was not the success ex-
pected, but those attending had
a jolly time, as they do at all en-
livening events, roads and other dances
in the district are responsible for
the slight attendance.

Treen-Stewart

A pretty wedding was solemnized on Saturday evening, November 16, at the home of Mr. and Mrs. D. J. Stewart, 1311 F U. A street north west, when their second daughter, Jessie Mae, became the bride of Henry Albert, son of Mr. and Mrs. W. R. Treen, of Calgary. Rev. Geo. Dickson performed the ceremony, only immediate friends and relatives being present.

The charming bride was becomingly gowned in a French model of ivory satin with veil and orange blossoms, and carried a shower bouquet of Madame Butterfly roses and lilies of the valley. Her only ornaments were a platinum pendant and earrings set with diamonds, gifts of the bridegroom.

The bride entered the drawing room on the arm of her father to the strains of Lohengrin's wedding march, rendered by Miss Eileen Scott. Miss Evelyn Stewart, sister of the bride, made a pretty bridesmaid, being attired in pale yellow cut velvet and carried a bouquet of sweetheart roses. Mr. Clarence Armstrong acted as groomsmen.

Following the ceremony a buffet supper was served. Those present were: Mr. and Mrs. D. J. Stewart, Mr. and Mrs. W. R. Treen Sr., Mr. and Mrs. W. R. Treen, Jr., Mr. and Mrs. C. Armstrong, Mr. and Mrs. W. Treacy, Mrs. Groom, C. H. Dunham, Miss Ida Giles, Miss Mabel Giles, Miss Eileen Scott, Miss Helen King, Miss Josephine Bird, Miss Elsie Oldson, Miss Irene Walters, Miss Isobel Steel Smith, Miss Isobel Dalgleish, Miss Thelma Gammon, Miss Lillian Stewart, Miss Evelyn Stewart, Cameron Stewart, Allan Barnes.

The bride and bridegroom left later on a four-month honeymoon trip to California.—Calgary Herald.

Automatic phones will be installed in Drumheller at midnight on December 7.

Tuxis Boys

At a meeting in the United Church after the services on Sunday evening the Tuxis Boys installed the officers elected at the previous meeting. They are as follows:

Mentor—Elmer Evans,
Pretor—Lyle Begon.
Sub Pretor—John Howton.
Scripitor—Vince Rideout.
Comptor—George Connell.

George Connell has been selected by the Tuxis Boys as their choice for parliamentary honors. The boys' parliament will be held in Edmonton some time this winter. Youngstown and Cereal also have candidates. The former has Walter Coad and the latter Edward Bredin, the member for this division last year. This division extends from Scottfield to Sibbald, inclusive. The vote will be taken between November 30 and December 5. George Connell is out to win, and his friends, both young and old, wishes him success, as they feel he will make a good representative and a credit to the district. The boys' parliament is a popular movement over the entire province.

On Wednesday evening the Comets Tuxis Square had their initiation meeting. Five members were conducted through the ceremony and then welcomed in a very thorough manner.

In the business part of the meeting the boys discussed ways in which they could help in making the skating rink.

Ohio State, generally represented by one of the strongest eleven in the Western Conference, has played 333 football games in the past 39 seasons.

Jack Skelton, the 14-year-old son of urgent Skelton, of the A.P.P. Torpe Drumheller, was killed instantly in an auto accident, 10 miles south of Calgary on Wednesday afternoon last week.
